

Changing Settings on CoreMax/ZeroMax Torque Wrench

- You will need administrative permissions on your PC
- Tool Programming cable required. Included with original tool. Any USB Type A to USB Mini cable should work.

1646 Terrace Drive Roseville, MN 55113 Phone: (800) 444-2373 Email: fastsales@fastestinc.com www.fastestinc.com

Introduction

These instructions are intended to help customers of the CoreMax[®] & ZeroMax[™] electric Torque Tools make adjustments to the tools should that be required.

FasTest uses Ingersol Rand (IR) torque guns as the basis of our offering for production tools to accurately apply the sealing torque for the CoreMax & ZeroMax Access Port Systems. We modify them to add the "Drive Head" and preset the correct torque setting and rotational speed to achieve a leak-free joint. They are shipped to the customer pre-programmed.

In order to achieve a proper torque both the torque setting and the rotational speed are important. The specifications are as follows:

- CoreMax:
 - "In-Line" Torque Wrench (SCFTP05xx):
 8 ft-lb888 (10.9 r
 - "Pistol Grip" Torque Wrench (SCFTP06xx):
- "ZeroMax
 - "Pistol Grip" Torque Wrench (SCFTP07xx):

8 ft-lb888 (10.9 n-m) +/- 0.5 ft-lb (0.68 n-m) & 200 rpm (+/- 5 rpm) 8 ft-lb888 (10.9 n-m) +/- 0.5 ft-lb (0.68 n-m) & 200 rpm (+/- 5 rpm)

4 ft-lb888 (5.4 n-m) +/- 0.5 ft-lb (0.68 n-m) & 200 rpm (+/- 5 rpm)

Install ICS Software

- 1. <u>https://irtoolhelp.ingersollrand.com/hc/en-us/articles/360013807354-Download-and-Install-ICS-software</u>
- 2. Extract downloaded files
- Inside the folders, run the ICSInstaller. If you do not see the admin symbol on the icon, you will need to run this as an administrator.
- 4. When prompted to allow the program to make changes, select yes.

Setup ICS Software

- Navigate to the Bin folder where you installed ICS. Default location is C:\Program Files (x86)\Ingersoll Rand\ICS\Bin
- 2. Find IRICSApplication. Right click and run as administrator
- 3. Allow the program to make changes
- 4. When prompted that no license is loaded, click ok
- 5. Select ICS-Nw-Master.lic. This is a 30 day demo license.

Setup ICS Software

- This step will not matter if connected to a tool via USB, but select your ethernet adapter if you know it.
- 2. If prompted, allow ICS on both public and private networks
- 3. When ICS opens, go to File > Log off
- 4. Login. Username is *supervisor*. Password is *sollinger*.
- 5. Close ICS

Install Tool Driver

- 1. Open Device Manager on your computer
- 2. Plug USB into the port on the top of the tool. There is either a red or black slide that protects the port.
- 3. Under the Ports section, find the tool. If there are multiple options, you may need to unplug and plug in the tool to find which one it is.
- 4. Once found, right click and select update driver.
- 5. Click Browse my computer for drivers
- Navigate to the folder where you downloaded ICS and inside the Firmware folder, select Win10_QXToolDriver
- 7. Click Next and Install to install the driver

Change Tool Settings

- Reopen ICS. You can use the desktop shortcut now and should not need to run as administrator
- 2. With the tool plugged in and ICS open, you should see a connection message on the bottom of ICS.
- 3. Change Family to QX Series
- 4. Go to Setup > Quick Setup
- 5. Select the USB tool and Config 1 from the dropdowns

Change Tool Settings

- 1. Tools shipped with standard \pm 20% torque ranges
- 2. Correct Torque range should be $\pm .5$ ft.lbs
- 3. Set Torque High Limit to 8.5 and Torque Low Limit to 7.5
- 4. Click the X to close this screen. It will ask if you want to send the data to the tool. You must select yes.
